Attention Nature Lovers:
American Players Theatre Needs Your HELP!

Aggressive non-native weeds are crowding out our native wildflowers, shrubs, and trees. As native plants disappear, so does the wildlife that depends upon them.

Garlic Mustard is a swift-spreading weed that thrives in and along woodlands. In a matter of years, it can crowd out our entire forest floor of wildflowers, ferns, and sedges, creating a dense mat of weeds. In some forests, tree seedlings are strangled by the heavy growth of this invader.

We need volunteers like you to help stop our serious infestation. Get involved and help make a difference to the APT landscape. APT will also give you one free ticket voucher for a 2018 Hill show in appreciation for your help! (Some restrictions apply).

Join us on **Saturday, April 21st, April 28th and/or Saturday, May 5th from 9am to 12pm for APT's annual Garlic Mustard Pull.** Please note: we've shortened the pull to help you get back to your weekend.

Please return the form below to register for APT's "Weed Out!" Your help is greatly appreciated!

Thank You!

APT's "Weed Out!" 2018
