

AMERICAN PLAYERS THEATRE

Dear Volunteer,

Thank you for your interest in helping with the **Garlic Mustard Weed Pull** at APT. We need your help this year to continue the progress we have made, and to focus on a new area that has recently been cleared of red cedar, and is vulnerable to invasive species such as garlic mustard until the prairie remnant can fully establish itself.

We will be pulling on Saturday and Sunday, April 30th and May 1st from 10:00 am to 3:00 pm.

Garlic Mustard is a swift-spreading weed that thrives in and along woodlands. In a matter of years, it can crowd out our entire forest floor of wildflowers, ferns, and sedges, creating a dense mat of weeds. In some forests, tree seedlings are strangled by the heavy growth of this invader. We need volunteers like you to help stop our serious infestation. Get involved and help make a difference to the APT landscape.

Join us on one or both days. Pulling and picnicking. We'll furnish the food and drink if you'll furnish the labor. Please share this information with your friends and neighbors who may be interested in helping.

Thank you,

Dundee McNair
Director of Operations

Please return the form below for more information and to reserve a lunch for the "Weed Out!"
